

## 6. Editing Multiple Files

Editing multiple files in vi is possible in two different ways:

invoke vi with multiple files on the command line

use command :e from within vi

Once the files are loaded, movement from one file to another can be accomplished using following commands:

```
:n      - next file
:e#     - previous file
Ctrl-^ - last edited file, keep cursor on last edited line
```

```
